Home Foreclosure Numbers and Rates by County, 2007-2011

* The average rate was calculated by finding the rate for each year, 2007-2011. This rate was calculated by dividing the annual number of foreclosures by the number of parcels in that county for that year. An exception to this is 2011: in that year, the number of foreclosures was divided by the number of parcels in 2010.

Map made by CURA Staff, Sept 2012
Data Sources: HousingLink (foreclosure and parcel counts), MN Secretary of State (2012 Senate District boundaries)
**The average annual rate was calculated by finding the rate for each year, 2007-2011. This rate was calculated by dividing the annual number of foreclosures in that district by the number of parcels in district in 2012.**
